About Me

Senior Azure PaaS Developer with 7+ years of experience in designing and implementing scalable cloud solutions. Adept at developing and optimizing Azure-based applications, ensuring efficiency and security. Passionate about delivering innovative solutions that enhance business processes and drive technical excellence

Education

• **VSSUT ,Burla | June 2018**

BTECH in Electrical &Electronics Engineering(CGPA :7.72)

• **KBRC , Odisha | May 2013**

+2 Science(Percentage: 84.00 %)

• **Niali High School | JUNE 2011**

10TH(Percentage:91.16%)

Certifications

- Azure Developer Associate(AZ-203)
- Azure Cosmos Db Developer Speciality (DP- 420)
- Pluralsight Angular IQ(Expert)
- Basic c # (MVA)

Skills

Front End JavaScript, TypeScript , HTML5, CSS, SCSS, React JS, Angular

Back End .NET Core/.NET 6 , Web API , Azure , Azure Functions, ACR , Service Bus , Kafka , Storage Account ,Azure Web Apps, Key vaults , Data Factory, Azure Cosmos Database, Azure SQL

Tools Visual Studio , VS Code , Service bus Explorer, Azure Storage Explorer, Cosmos Db Explorer, Docker

CI/CD Azure DevOps , GitHub Actions

Shell (SDE – JG5)

Oct 2023-Present

Project : Digital Transformation of Trading & Supply apps

- Owned module feature development end-to-end, from requirement gathering to production deployment
- Implemented Aggregation computing Engine of Power Trading portfolio Data with CQRS design pattern to achieve microservice based Event Driven Architecture,
- Led developing shared Components ,10 major pages in React JS ,Generic Control Table Structures, Charts and patterns and animated interactions to optimize User Experience,
- Led code reviews to ensure adherence to best practices, maintainability, and performance standards,
- Created cost-optimized GitHub Actions pipelines by minimizing unnecessary workflow runs and leveraging reusable jobs to reduce CI/CD expenses.,
- Narrowed down the cost of azure infrastructure by rearranging the Azure resources and implementing cost-effective solutions,
- Participated in cost effective Database system design for Azure Cosmos DB and created Change Feed systems by using Azure Functions to handle denormalization and Data Synchronization among containers,
- Led and mentored small teams for writing good quality code in React JS

Deloitte(Azure PaaS Consultant)

Oct 2020-Oct 2023

Project : Digital Transformation of Luxury Car Manufacturer

- Participated in RFPs, pilot architecture of Supply chain Transformation of Manufacturing the cars based upon future stock details using Azure Modernizations system designs(mostly Event Driven Patterns) .
- Handled & mentored a small team of 4 members for 4 microservice
- Developed Generic ControlTable Structures and 6 major pages in Angular 12 and implemented NgRx Redux as state management

Project : Multi cloud Integration Application

- Developed integration pipelines by using Azure Data Factory
- Created Durable Azure function(fan-out-fan-in pattern) which saves 30 % Production cost as well as increase performance
- Developed POCs for multi container application using Docker & k8s
- Designed .NET core multi container web API from scratch
- Implemented DevOps pipeline for .NET Core web API
- Developed Logging using Seri log and azure application Insight
- Exposed web APIs in Azure APIM and overwrite policies

Project : Payments and Billing Solution Architecture design

- Handled direct client interaction on approval of solution design
- Developed messaging integration system using Azure service Bus
- Created Technical docs with respect to serverless systems as per the organisation standard by interacting with Product owners
- Involved in requirement gatherings from Business documents
- Developed Module based integration and Solution architecture design by various Azure native Services Using Visio

Mindfire Solution (Full stack Dev)

Sept 2019-Sept-2020

Project : Digital Transformation of Retail Client

- Designed and developed responsive web layouts using bootstrap flex box as per requirements
- Developed reusable functional components in React JS
- Developed 55% of webapp by using React & Redux
- Implemented both synchronous and field type form validations using Redux Forms
- Developed 90% of Authentication server by using .NET Core web API and IdentityUser
- Implemented email messaging system using Azure function which decrease 20% of production cost
- Designed Libraries by Factory methods in .NETcore webAPI (c #)
- Deployed apps in Azure Web apps .

Accenture (Azure(PaaS) Dev)

Aug 2018-Aug 2019

Project : Exam Awarding Cloud Applications

- Applied Agile methodology and SOLID principle
- Responsible for creating responsive UI page layouts
- Implemented Angular Router to enable navigation from one view to the next as customer performs application tasks
- Created HTTP requests using RxJS Observable
- Developed Azure functions which triggered by ServiceBus Queue to interact with Azure Blob storage for Automatic PDF generation

AWARDS & ACHIEVEMENTS

- Deloitte 2 times Applause and Spot Awards
- AIR 1 in Inter college rocket competition by BRICS
- AIR 6 in Robocon 2017 ,Asia pacific robotics event
- AIR 3 in best use of MATLAB software ,Robocon
- Finalist in best use of MS Kinect sensor ,NIT RKL

INTERNSHIPS

BHABA ATOMIC RESEARCH CENTER(BARC)

- Worked on evaluation and Testing of SONAR based rangefinder with PIXHAWK flight

JINDAL STAINLESS LIMITED

- Worked on Distributed power system on MATLAB
